

The archive catalogue records every acquisition by year, subject and provenance. A reading room clerk cross-references each request against the shelf index before release. Bound volumes are stored spine-out, sorted first by collection and then by accession number. Restoration work proceeds slowly, one folio at a time, under controlled humidity.

Bound volumes are stored spine-out, sorted first by collection and then by accession number. Restoration work proceeds slowly, one folio at a time, under controlled humidity. The survey found that most requests concern maps rather than correspondence. Digitisation teams photograph each page twice, once in colour and once under raking light.

The survey found that most requests concern maps rather than correspondence. Digitisation teams photograph each page twice, once in colour and once under raking light. A duplicate catalogue is kept off-site in case the reading room copy is ever damaged. Visiting scholars must register with the desk before any box leaves the stacks.
